## Summary

---

A 4th year IT Engineering student specializing in Web Development, I have a great passion for designing and developing digital solutions using modern technologies. I use React.js with Vite to create interactive and responsive web applications. I have experience in designing smooth user interfaces and distinctive user experiences, and I always seek to learn the latest trends in web development and apply them in my projects.

## Work History

---

### Freelance Web Developer (React.js) | 05/2024 - Present

develop dynamic websites using React.js and Vite, emphasizing user experience, clean code, and optimal performance. I focus on creating reusable components to enhance efficiency and maintainability. I implement responsive design principles to ensure seamless performance across all devices. I utilize tools like React Profiler and code splitting to optimize performance and enhance loading times. I leverage state management techniques using Redux and Axios to handle complex application states effectively, and I prioritize accessibility best practices to create inclusive web applications that cater to all users. implemented RESTful APIs for seamless backend integration

## Skills

---

React.JS | Javascript | Redux | Axios, Responseive | UI/UX | Clean Code | Git, Communication Skills | Leadership Skills , Data Structures | Algorithm

## Education

---

### Damascus University | Syria

### Bachelor's Degree in IT Engineering

currently in 4 th year

## Languages

---

Arabic, English

## Projects

---

### Family Doctor

Sep 2022-Feb 2023

"Family Doctor" is a comprehensive platform designed to connect pharmacy owners (pharmacists) with drug warehouses. The platform offers a range of features to enhance the efficiency of pharmaceutical transactions:

Drug Browsing: Pharmacists can explore drugs categorized by their classifications.

Search Functionality: Users can easily search for specific drugs by name or classification.

Order Management: Pharmacists can specify the quantity they want, add items to their basket, and save drugs to their favorites list.

Purchasing: The platform enables seamless purchasing and order tracking, allowing pharmacists to monitor order statuses in real-time.

Invoice Management: Users can view detailed reports on invoices, review invoice statuses, and access comprehensive records.

The application supports both Arabic and English, ensuring accessibility for a diverse user base.

For drug warehouses, the accompanying web application provides robust functionality, including:

**Inventory Management:** Warehouses can add new drugs and classifications, as well as modify or delete existing entries through a detailed deletion process.

**Order and Invoice Review:** Users can review orders, invoices, and their statuses efficiently.

**Account Management:** Warehouse operators can update account information while enjoying full support in both Arabic and English.

This dual-platform approach streamlines operations for both pharmacists and drug warehouses, fostering a more efficient pharmaceutical supply chain

Bingo Way

May 2024-sep 2024

Bingo Way is a comprehensive tourism management system designed to streamline the travel planning process and enhance user experiences through its mobile application and web platform.

**Mobile Application Features:**

**Reservations Made Easy:** Users can effortlessly book accommodations, transportation, and activities.

**Custom Itineraries:** Create personalized travel plans tailored to individual preferences.

**Destination Exploration:** Discover new destinations and read user reviews to make informed decisions.

**Web Platform Features:**

The web application empowers tourism businesses by providing robust management tools, including:

**Business Management:** Manage hotels, tourist trips, and activities worldwide, as well as taxi services if applicable.

**Customization:** Add hotel details, including locations, pricing, and specific information about each property.

**Reservation Oversight:** Review current bookings and manage listings for properties no longer owned.

**Key Functionalities:**

**Comprehensive Coverage:** Addresses all aspects of tourism management, including hotels, apartments, chalets, trips, and activities.

**Multilingual Support:** Available in multiple languages, including Arabic, English, French, and more.

**Advanced Search System:** Allows users to find services quickly and efficiently.

**Offers and Discounts Management:** Easily manage promotions, events, and seasonal discounts.

**User-Friendly Interfaces:** Responsive design ensures a seamless experience across all devices.

**Analytics and Insights:** Utilize charts to monitor your business performance and stay updated with the latest news and weather relevant to your tourism operations.
