Broker (Freelance)

"Broker" is a platform that connects shop owners and couriers. It allows shop owners to browse products, add items to their cart, make purchases, and track order statuses through a detailed system that includes an order archive and invoices with advanced filtering options. On the other hand, couriers can accept or reject orders, deliver them with real-time location tracking, and add invoices for specific customers

- Skills: Flutter , Dart , Restful Api's , Firebase , Getx , MVC ,Responsive and adaptive UI,Background services

Elegant Store

e-commerce app that allows users to browse products, search within categories, view product details and reviews, and add items to favorites or the cart. It supports order creation, tracking, and secure online payments for a seamless shopping experience
